Tacoma, WA | (206) 474-7990 | [thanaporn.plangphatt@gmail.com](mailto:thanaporn.plangphatt@gmail.com) | <https://github.com/shinploidsukei> (Portfolio) | <https://www.linkedin.com/in/ploid/> | Work Authorization: F-1 OPT/CPT

## PROFESSIONAL SUMMARY

Backend Software Engineer and M.S. Computer Science candidate with 3 years of experience at ExxonMobil building automation tools, cloud monitoring solutions, and distributed systems. Experienced in Python, Java, AWS, Docker, Kafka, and microservices, with hands-on development of cloud-native, AI, and IoT applications.

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript, TypeScript, C++, PowerShell, Bash

**Backend:** REST APIs, FastAPI, Node.js, Kafka, Microservices, Distributed Systems, Event-Driven Architecture

**Cloud & DevOps:** AWS (Lambda, S3, EC2), Azure, Docker, Git, GitHub Actions, CI/CD, Linux

**Databases:** PostgreSQL, MySQL, MongoDB, InfluxDB

**Frameworks:** React, Next.js, Flutter

## PROFESSIONAL EXPERIENCE

**SWIFT Platform Analyst** | ExxonMobil Corporation | Bangkok, Thailand | Aug. 2022 – Feb. 2025

- Developed PowerShell automation tools that reduced DataDog onboarding time by over 80%, streamlining enterprise monitoring deployments and eliminating manual configuration tasks.
- Built internal tooling to automate DNS health monitoring and reporting, eliminating repetitive manual validation processes.
- Supported large-scale cloud monitoring migration from AppDynamics to DataDog by developing scripts, validating integrations, and coordinating deployment activities across infrastructure and security teams.
- Contributed to platform reliability initiatives supporting critical enterprise financial messaging systems.

**IT Support Technician - Intern** | Ajinomoto Co., Inc. | Bangkok, Thailand | Jun. 2021 – Aug. 2021

- Built RPA workflows that removed most of a recurring daily task and shipped PowerBI dashboards for the support team.

**Information Technology Technician - Intern** | SS&C Technologies | Bangkok, Thailand | Jun. 2020 – Aug. 2020

- Built a C++ (MFC) internal data-validation tool and owned its full lifecycle: testing, docs, and user onboarding.

## TECHNICAL PROJECTS & RESEARCH

**Trading Agents Platform** | Python, Kafka, Docker, PostgreSQL, Grafana | <https://github.com/shinploidsukei/trading-agents>

- Designed and implemented a distributed event-driven trading platform using Kafka, Python, and PostgreSQL to support real-time market data processing and autonomous trading agents.
- Developed containerized microservices for trading, risk management, and market analytics, evaluating system latency, throughput, and fault tolerance under simulated workloads.

**Serverless AI Image Processing Pipeline** | Python, AWS, Docker | <https://github.com/shinploidsukei/images-art-transformation>

- Architected a serverless image processing pipeline using AWS Lambda, S3, FastAPI, and Docker to automate image ingestion, preprocessing, and AI-driven transformations.
- Integrated DeOldify and Google Gemini APIs for image colorization and style transfer while benchmarking performance across serverless and containerized cloud architectures.
- Implemented CI/CD workflows using GitHub Actions for automated testing and container deployment.

**RxAssist Smart Dispenser** | Python, Node-RED, InfluxDB, Raspberry Pi

- Developed an IoT-enabled medication dispenser that combines QR/OCR prescription processing, automated scheduling, and motorized dispensing on Raspberry Pi hardware.
- Built a real-time monitoring platform using MQTT, InfluxDB, and Grafana to track medication adherence, device status, and patient interactions through cloud-connected dashboards.

## EDUCATION

**University of Washington** | Tacoma, WA | M.S. Computer Science and Systems | GPA: 3.72 (Expected March 2027)

- **Thesis:** Adaptive ECG arrhythmia detection using explainable AI and multi-criteria model selection
- **Coursework:** Advanced Algorithms, Applied Distributed Computing, Internet of Things, Cryptology

**Mahidol University** | Nakhon Pathom, Thailand | B.S. Information and Communication Technology | Aug. 2022

- **Senior Project:** Developed VHelp, a cross-platform mobile application (iOS & Android) for individuals with depression, featuring 10+ functionalities. Designed the UX/UI and built the application from scratch.

## CERTIFICATIONS

- Azure SC-900, Splunk Certified
